

MMP LA5-12V-20-A-150

PERFORMANCE CURVES:

The left graph shows Speed (in/s) on the y-axis (0.0 to 0.7) and Output Force (LBS) on the x-axis (0 to 600). The speed decreases linearly from approximately 0.66 in/s at 0 lbs to 0.56 in/s at 550 lbs.

Output Force (LBS)	Speed (in/s)
0	0.66
200	0.62
400	0.58
550	0.56

The right graph shows Current (A) on the y-axis (0 to 14) and Output Force (LBS) on the x-axis (0 to 600). The current increases linearly from approximately 2.2 A at 0 lbs to 13.2 A at 550 lbs.

Output Force (LBS)	Current (A)
0	2.2
200	6.2
400	10.2
550	13.2
